24 August 2009

ADT Security named Asia Pacific's Physical Security Company of the Year

ADT Security has been named Physical Security Company of the Year at the 2009 Frost & Sullivan Asia Pacific Industrial Technologies Awards. In its fourth year, the coveted awards recognise companies who have achieved outstanding performance through best practice in the competitive Asia Pacific marketplace.

Sanjay Singh, vice president for Industrial Technologies at Frost & Sullivan commented, "We believe that organisations that have successfully navigated the past 12 to 18 months and have shown exemplary performance in growth, expansion and customer acquisition need to be recognised so as to inspire and positively influence all their stakeholders and customers. This is precisely what the Industrial Technology Awards aims to do."

"ADT Security's expertise in security system integration has enabled its customers to optimise resources. Its dedication to customer needs, teamed with its global experience, extensive product range, technical competency and ability to deliver, has enabled ADT to significantly grow its business throughout the Asia Pacific region. This is evidenced by 30 percent growth in its access control and video surveillance business which has outstripped the overall industry growth in the region."

Speaking at the awards ceremony in Singapore, Robert Zhu, President, ADT Security Asia Pacific said, "It is a privilege to receive this prestigious industry award. In difficult times, an increased number of security issues threaten the livelihoods of many businesses, yet the need to conserve capital and efficiently leverage resources is more important than ever."

"This recognition is significant for us as it acknowledges our efforts in bringing our customers superior solutions that address their unique needs in this challenging environment."

A world leader in providing integrated security solutions, ADT Security's solutions are implemented in key infrastructures throughout the Asia Pacific region. The majority of Fortune 500 companies select ADT Security to help them protect people, property and assets.

The Frost & Sullivan Industrial Technologies Awards identify and credit best practices by companies across six industrial segments - Electronics & Security; Industrial Process Control; Energy & Power

Systems; Chemicals, Materials & Food; Measurement & Instrumentation; and Environment & Building Technologies. In keeping with the company's commitment to excellence and innovation, the awards offered are carefully reviewed and evaluated to reflect the current market landscape inclusive of the emerging technology trends.
