

ADC V722W - Outdoor Camera

Installation Guide

Required Items for Installation

- ADC-V722W Camera
- AC Power Adapter
- Ethernet or Wireless Internet Connection
- Computer/Tablet/Smartphone device
- Subscription to ADT Interactive with video service enabled

2 Options to connect ADC-V722W to the Wireless Network

Wi-Fi Protected Setup (WPS) Mode

Wirelessly connect the camera using a WPS enabled router

Access Point (AP) Mode

Use an Internet enabled device to connect the camera

Connect using Wi-Fi Protected System (WPS) Mode

- 1. Connect AC power adapter and plug into an outlet
- **2.** After 2 minutes, hold down the WPS button until LED flashes blue (3 seconds)
- 3. Press the WPS Button on the router
- 4. Wireless connection is complete once the LED turns solid green
- **5.** Follow instructions under **Video Device Enrolment** to add the camera to your ADT Interactive account

Connect using Access Point (AP) Mode

- 1. Connect AC power adapter and plug into an outlet
- **2.** After 2 minutes, hold down the WPS button until the LED flashes white (6 seconds).
- **3.** Using your internet enabled device, search for available networks.

Connect to the wireless network **ALARM (XX:XX:XX)** where **XX:XX:XX** is

the last six digits of the ADC-722W's MAC address.

- (The MAC Address can be found on the back of the mount of the camera.)
- 4. On the same device, open a web browser and enter

http://722winstall in the URL field.

- 5. Follow the following on-screen instructions
- A. Select the Wi-Fi network that the camera will connect to

WPS Button located on the back of the camera

B. Click Scan for Wi-Fi Networks

Language

WLAN Settings
